POPULATION

➤ Ethnical groups:

- Number of people around : 105 020 habitants
- 18 ethnical groups dominated by SAKALAVA
- 05 rural Communes, 46 villages

Structure of governance:

- Community management of traditional type:
 - Respect of fady (Exp: reglementation of use and introducing fishing nets in Sijoro coastal village
 - The taboo requires the respect of the reglementation (Exp: Tuesday and Thursday all field works and the practice of all ritual ceremonies are prohibited.

➡ The Community business application is under the authority of Prince ARANA IV by the means of one collective DINA called DINA IOMBONANA

- Public administration by MNP:
- Central surface of reserve biosphere managed strictly by MNP
- Governs with COAP law (PN of categorie II according to UICN)
- Buffer zone (Zone Tampon). Surface of transition from the RB: Governs with COAP law and also with collective Dina
- Management tools: PAG, all Manual of procedure technical and administrative and Finance

- Collaborative management with COSAP

The different projects which were implemented at Reserve Sahamalaza Biosphere

- Transfer of natural stock management financed by UNDP;
- Generating revenues Activities for Community surrounding the RB financed by World Bank;
- Sauveguard Plan for social, economic and environnemental Protection financed by The World Bank;
- Durable Inshore Fishing financed by KFW

RESULT of the project

Compensation of the PAP'S:

- 89% of the PAP's (Population affected by the project) are compensated, 79% of the PAP's are formed and followed by the MNP team and other professionals 99% of equipment and inputs are distributed to the recipients.

Problems:

- Delay of equipments arrival;
- Difficulties of access of the zone during the season of rain;
- Not enough rain ;
- Majorities of the PAP are illiterates;
- Duration of short project involving a fast planning of the activities.

For life
